## B7243 Applications Previously Using B227

In February 2004, Baldwin Filters withdrew the B227 as a replacement for the applications that called for the Mitsubishi MZ690116 lube filter, due to pressure conditions that exceeded the B227 design limits.

In March 2005, Baldwin introduced the B7243

lube filter designed to meet the structural requirements of the Mitsubishi MZ690116/Hyundai 26300-35501. The primary group of applications is listed below. *The B227 continues to be used on many other applications that were not involved with the issue stated above.*
